BALOGUN NASIRAT ADEFUNKE

JUNIOR PRODUCT MANAGER | FINTECH, USER STORIES & PRODUCT DELIVERY

Lagos, Nigeria · +234 708 593 3122 · nasiratbalogun@gmail.com

PROFILE

Detail-oriented product professional with hands-on fintech experience across a BNPL product and a crypto wallet/P2P exchange platform, covering user feedback, requirements, testing and release support. Currently Product Lead on a team building Haven, where I turn requirements into user stories, prioritise the backlog and follow up on actions and timelines. Analytical, organised and execution-focused, with strong written communication. Google PM Certified.

CORE COMPETENCIES

User Stories & Requirements · Product Delivery Coordination · Timelines & Action Item Follow-up · Product Testing & QA · Issue Tracking · Product Documentation · Backlog Prioritisation · User Feedback Analysis · Cross-functional Collaboration with Product & Engineering · Fintech Products (BNPL, Crypto Wallet, P2P) · Jira · Asana · Notion · Trello · Excel · Google Workspace · Slack · AI Tools

EXPERIENCE

Product Lead (Current) | *Haven, Mental Health & Peer-Support App*

- Turn requirements into user stories and prioritise the backlog with the team, following up on action items and timelines through testing to release.
- Coordinated a third-party integration for real-time audio and video calling (LiveKit), from requirements through end-to-end testing.
- Track issues in a bug list and verify fixes, and planned the admin dashboard and activity log requirements, using anonymous member IDs to protect privacy.

Product QA & Release Support | *Fidelity BNPL (Fintech)*

- Owned end-to-end testing and user acceptance checks across the BNPL platform, catching critical payment-flow bugs before launch.
- Logged and triaged 45+ issues pre-launch, working with engineering to prioritise fixes by user impact and release deadlines, and validating fixes once delivered.
- Documented defects with clear reproduction steps and root-cause notes, so engineering could investigate and fix faster.

Product Support (Discovery & User Feedback) | *Riddo Exchange, Crypto Wallet & P2P Exchange Platform (Fintech)*

- Worked with the Product Manager across 3 discovery sessions, bringing user pain points and feedback that shaped priorities for in-app P2P trade matching.
- Turned recurring user feedback into structured feature proposals, giving the Product team clear insight into common user challenges and improvement opportunities.

CERTIFICATIONS

- Google Project Management Professional Certificate, Coursera (2026)
- Project Management Training Programme, TS Academy (2026)
